About This Guide

Welcome to the *2024-2025 Southeast Georgia Healthcare Guide™* (SEGHCG), the most comprehensive healthcare reference and referral directory in the region. This one-of-a-kind guide will be your go-to resource for locating healthcare providers in Southeast Georgia. Within the pages of

this book, you will also find articles dedicated to keeping the medical community informed about advances in medicine as well as trending topics.

The healthcare industry is a major contributor to the success of the area's economy. On page 3, we discuss how the growth of local healthcare facilities is beneficial for the vitality of the Southeast Georgia community.

In Southeast Georgia we experience an array of natural disasters, so on page 5 we discuss the best ways to prepare your medical practice for a natural disaster such as a hurricane.

As we do in every issue, we have included information on continuing education to keep your practice up to date. That information begins on page 10.

Our Green Pages™ section is an easy-to-use, comprehensive directory of all the healthcare providers in Appling, Bacon, Brantley, Camden, Charlton, Glynn, McIntosh, Pierce, Ware and Wayne counties, as well as the Savannah area. That section begins on page 23. The Green Pages include alphabetical listings on all area physicians with references to page numbers, as well as listings of physicians by specialty. Also included are area hospitals and other ancillary healthcare providers and services. If available, the listings include National Provider Identifier (NPI) numbers for further convenience.

Our goal is to present the most accurate and up-to-date information in our publication. Our Data Specialists have researched and verified the listings through August 2024. However, if your listing needs to be corrected, please complete the form on page 120, and mail or fax the form back to us. Please feel free to submit changes on our website at www.heritagepublishinginc.com/update-listing.

Finally, we encourage you to support our exceptional advertisers. Without their continued participation, we would not be able to produce this vital publication. As always, we deeply appreciate their partnership.

Healthcare's Economic Impact in Southeast Georgia

Photo courtesy of Memorial Satilla Health

Southeast Georgia has a flourishing healthcare industry that provides numerous benefits to the community. As we take a look at the expansion of area healthcare facilities, we see the healthcare industry has a positive impact on the local economy.

Healthcare is a Top Employer in Southeast Georgia

The expansion and growth of the medical community not only brings better patient care, but also brings jobs directly to the area. A prime example of this is the healthcare industry being a major employer for the region. In Glynn County, Southeast Georgia Health System is the third largest employer, with 1,700 employees. In Camden County, the health system employs 500, making it the county's sixth largest employer. In Appling County, Appling Healthcare System is the third largest employer with more than 300 employees. In Ware and Waycross counties, Memorial Satilla Health employs 750 people, making it the area's top three employer. In Bacon County, the Bacon County Hospital and Health System is a top employer as well.

Healthcare Facilities Projects and Expansion

Appling Healthcare has begun construction to renovate and extend the canopy over what now serves as the hospital's main entrance. The project will further streamline patient flow by improving entrance into the facility. Extending the entrance canopy will allow for a covered area for patients to safely exit their vehicles and enter the building. "We are thrilled to have received another grant to improve our facility," said Andrea Graham, Appling Healthcare CEO. "It's always exciting when we can forge ahead and enhance our facilities, focusing on patient safety and the overall patient experience."

The Southeast Georgia Health System Brunswick Campus has grown and expanded over the past few years to meet the needs of the community. The 300-bed facility completed a \$142 million renovation and expansion project in 2022. Launched in 2018, the project completed over 70,000 square feet of new construction and renovations.

The new surgical services tower, completed in November 2020, includes 16 large, state-of-the-art operating suites, 32 private prep and recovery bays, 32 private patient

rooms and a new main entry at Parkwood Drive.

The changes to the emergency care center were completed in July 2021 and include a new covered patient entrance and a new ambulance entrance. The number of treatment rooms increased from 35 to 50 and now includes two new trauma rooms. The emergency center also features a new imaging area, including expanded spaces for CTs, X-rays and ultrasounds.

Additionally, the rooms on the St. Simons Tower's fourth and fifth floors were converted to 64 spacious, private patient rooms.

The expansion project also incorporates infrastructure upgrades within its central energy plant to accommodate the expansion and was built so that two additional floors and patient rooms could be added in the future if there is an increased demand for services, according to Southeast Georgia Health System.

According to a Southeast Georgia Health System annual report, "Southeast Georgia Health System's main focus is meeting the healthcare needs of the community, but it also has a positive impact on the local economy." The health system generated more than \$908 million in revenue for the

St. Joseph's Hospital in Savannah

Southeast Georgia Health System

Healthcare's Economic Impact in Savannah

According to a report published by the Savannah Area Chamber of Commerce, "The health sector continues to be a vital component of the area's economy and growth prospects are good in the short and long run."

In the Savannah metropolitan region, healthcare accounted for an estimated \$1.8 billion of personal income in 2022 or 7.7 percent of total regional personal income. St. Joseph's/Candler Health System is the region's No. 1 non-manufacturing employer with 4,832 employees. HCA Memorial Health University Medical Center is the No. 2 non-manufacturing employer with 3,869 employees. The No. 8 employer, Optim Health System, has 979 employees. The No. 15 employer, SouthCoast Health, has 592 employees.

A Promising Outlook on the Future

The vibrant and expanding healthcare industry in Southeast Georgia contributes significantly to the overall economy of the region. Healthcare generates higher paying jobs, contributes to growth in sales and employment in other business sectors, facilitates the attraction and retention of new businesses, and enables consumers to effectively and conveniently access quality health care in their own community. With all these factors combined, it is safe to predict that the already significant economic impact of the local healthcare industry will continue to flourish for years to come.

"The health sector continues to be a vital component of the area's economy and growth prospects are good in the short and long run."

state and local economies according to the most recent data from the Department of Community Health, Division of Health Planning, Hospital Financial Survey. In Fiscal Year 2023, the health system reported that it has 46 employed physician practices throughout Southeast Georgia, 442 medical staff members, and 2,549 team members.

Bacon County Hospital, photo by Micheal Rivera

network of hospitals across the U.S. “As an acute care hospital, our resources are committed to providing for our patients and staff who will remain here to care for them during the duration of the storm,” according to Memorial Health.

How Local Medical Practices Can Develop a Disaster Plan

For medical practices, implementing your own disaster plan will ensure your practice is kept safe in the event of a natural disaster such as a hurricane, tornado or flood. Try to have a plan established before any threat occurs. Go over the plan with your staff so everyone is well prepared in an emergency. Familiarize yourself with Southeast Georgia’s evacuation routes, emergency phone numbers and shelters. If you are in a situation where you cannot leave your building, find an enclosed, windowless area in the center of the building away from any glass.

Insurance Coverage

Have adequate replacement insurance that covers fire, flooding, and catastrophic damage from natural disasters. Have an updated inventory of all your practice’s equipment in case anything gets damaged. Make sure your insurance policy also includes business interruption coverage in a sufficient amount.

Employee Communication

When it comes to implementing an effective disaster plan, communication with employees and staff is key. Notify staff as soon as possible about an office closure. To contact every employee, keep a list of everyone’s cell phone numbers and email addresses.

Patient Communication

Let your patients know the best way to get in touch with your office when a disaster occurs. Post an alternate telephone number and email address on your website and social media platforms. Since many answering services are down during a major disaster, consider using VoIP (Voice over Internet Protocol). This phone service uses broadband internet connectivity and is more likely to stay in service during a natural disaster.

Protect Your Property

Have plywood on hand to protect windows and doors from dangerous debris caused by wind. Consider trimming branches from trees close to your building that could fall and cause damage. Anchor large furniture such as bookshelves or file cabinets to the wall. Have a secure place to store office electronics, preferably in a high-up place where any possible flood water can’t reach.

Keep Important Documents Safe

To avoid losing important information, keep electronic files whenever possible. It is

especially important for medical practices to prevent loss of patient health data. Conduct regular data backups before a disaster occurs, not just when a threat like a hurricane is close. Back up all your electronic health records and other medical documents using cloud hosting services, which will ensure your data is kept safe in an off-site secure location. Keep the contact information for your cloud hosting services handy if you need to contact them to recover your data. Keep a copy of important business contacts such as lawyers, accountants, suppliers, banks, etc. in a safe secondary location.

Southeast Georgia Health System

CyberKnife, photo by Chris Moncus Photography, courtesy of SGHS

With campuses in Brunswick and St. Marys, Southeast Georgia Health System is the premier source of comprehensive healthcare in Southeast Georgia. The health system has served residents and visitors for well over a century in Brunswick, and through the years has expanded services throughout the region with locations in Camden, Glynn and Wayne counties. As the communities it serves grow, the health system's

commitment to meeting their healthcare needs remains strong.

Advanced Robotic Technologies

Robotic-assisted surgery is not only for big cities. Southeast Georgia Health System offers multiple robotic systems that doctors say are revolutionizing how they perform surgeries and treatment options.

The health system is one of only three cancer centers in Georgia to use the CyberKnife® M6 Series with MLC technology, a fast, effective radiation treatment option for cancerous and noncancerous tumors. CyberKnife

treats breast, brain, liver, lung, prostate, pancreatic and spine cancers. Despite its intimidating name, CyberKnife treatment is noninvasive—and treatments take as little as 15 minutes and can be completed in one to five sessions with no anesthesia. The robotic radiation delivery system uses real-time imaging to track the targeted area and projects beams of intense energy directly to the tumor without harming any surrounding tissue.

“CyberKnife offers sub-millimeter precision, which allows for higher doses and substantially shortened treatment sessions,” explains Timothy A. Jamieson,

MD, PhD, medical director of the health system's Cancer Care Center and CyberKnife program. "Shorter treatments result in minimal disruption to the patient's daily activities and work, and greater accuracy means fewer side effects."

Robotic-assisted technology is also aiding the health system's orthopaedic surgeons. In 2008, Denny A. Carter, MD and Beau Sasser, MD were among the first physicians in the country to use the revolutionary, surgeon-controlled Mako® robotic joint replacement technology for total hip replacement, and total and partial knee replacement. Since then, they have successfully completed hundreds of Mako joint replacements.

"A Mako procedure does more than just restore mobility and quality of life for our patients, it changes their life," says Dr. Sasser, vice chief of the Department of Surgery at the Brunswick Campus. "The technology makes joint replacement more precise and preserves healthy bone and tissue, resulting in improved patient outcomes."

"CyberKnife offers sub-millimeter precision, which allows for higher doses and substantially shortened treatment sessions."

At its Camden Campus, the health system's orthopaedic team offers ROSA® knee replacement technology. ROSA, which stands for Robotic Surgical Assistant, is used in knee replacement, similarly to the Mako, to tailor the placement of knee implants for each patient's specific needs.

"There are several advantages to using the ROSA technology, including the fact that it allows us to view and collect data on a patient's knee both before and during surgery," explains M. Christopher Yonz, MD, board-certified orthopaedic surgeon with Summit Sports Medicine & Orthopaedic Surgery in St. Marys, and

chief of the Department of Surgery at the Camden Campus. "We can perform a 'virtual knee replacement' before making the first incision, which allows for the most accurate position and placement of the total knee components."

The health system uses the da Vinci® Robotic Surgical System for bariatric, general, gynecological and urological surgeries. The da Vinci is a high-definition imaging technology that allows physicians to perform surgeries with unmatched precision and control. Compared to traditional surgeries, the innovative da Vinci technology results in less blood loss, fewer complications, shorter hospital stays and smaller incisions.

J. William Tsai, MD, FACS, board-certified surgeon at the health system's Brunswick Campus, specializes in gastric sleeve procedures using advanced, minimally invasive laparoscopic techniques. "Robotic surgery allows for a shorter hospital stay and recovery. Patients experience less pain and can resume regular activity within six short weeks."

Darrin A. Strickland, MD, vice chief of the Obstetrics & Gynecology Department, Brunswick Campus, adds, "The da Vinci improves the surgeon's ability to perform procedures that once were invasive and potentially dangerous for some patients. No longer are large incisions and scarring

Dr. Carter and Dr. Sasser with Mako, photo courtesy of SGHS

necessary when performing surgeries like hysterectomies or ovarian cystectomies.”

Southeast Georgia Health System also offers Ion Bronchoscopy, a robotic-assisted technology that allows a much more precise and safe way to biopsy suspicious lung lesions. Ion allows surgeons to access all 18 segments of the lung. Biopsies with Ion not only extend the physician’s reach, they are faster and more accurate than traditional methods, which means patients are less likely to need a repeat procedure.

“Historically, more than half of the nodules are far out in the narrow periphery of the lungs,” explains Rafael Alba Yunen, MD, board-certified pulmonologist at the health system’s Brunswick Campus. “Being able to reach all nodules in a lung for biopsy is one of the keys to detecting lung cancer in its beginning stages when it is most treatable.”

Experts at Treating Wounds

Southeast Georgia Health System has two centers that provide specialized wound care: the Brunswick Campus Wound Care Center and the Wound Care Center on the Camden Campus.

Both of the health system’s outpatient Wound Care Centers offer specialized care for all types of chronic and slow-healing wounds, such as diabetic foot ulcers, wounds caused by poor circulation and vascular disorders, pressure sores, traumatic wounds and radiation wounds. The staff includes physicians with advanced training in lingering wounds caused by a variety of conditions and nurses trained in chronic wound care. Cutting-edge treatments include negative pressure wound therapy, total contact casting, bio-engineered tissues, biosynthetic dressings, growth factor therapies and hyperbaric oxygen therapy (HBOT), which works by surrounding the patient with 100 percent oxygen to help progress the healing of the wound.

Approximately 30 percent of Wound Care Center patients qualify for HBOT treatments. Qualifying patients with medical clearance to undergo HBOT are prescribed 90-minute treatments in a pressurized chamber to highly saturate the body with oxygen and help the body better heal itself. Typically, patients undergo a series of 40 HBOT treatments.

DaVinci, photo by Chris Moncus Photography

“We are committed to providing our patients with leading-edge technology along with individualized treatment plans, to get our patients back to their best health. We are proud and honored to have both Centers recognized for their hard work and commitment to our Mission: Find. Treat. Heal.”

“Patients are in an enclosed, clear chamber, and staff are able to communicate with them throughout their treatment. The HBOT chambers are also equipped with a television,” explains Ashley Holland, RN, director, Wound Care Centers.

Eric Segerberg, MD, general surgeon and medical director of the Wound Care Center Brunswick Campus, says many people often mistake HBOT as a terminal treatment option. “HBOT is not a last resort,” he

explains. “Rather, it is the primary driver of angiogenesis or the growth and development of new blood vessels that deliver oxygen to the wound.”

HBOT is also an effective treatment for radiation injuries and inflammation as a result of cancer treatments. This includes damage to the head and neck tissues, as well as the bladder, rectum and bone. HBOT helps relieve these secondary side effects and promotes better healing outcomes.

The health system’s Wound Care Centers have both been recognized for excellence in wound healing, most recently receiving the Robert A. Warriner III, MD, Clinical Excellence Award and Center of Distinction Award. This marks the eighth consecutive year for the Brunswick Campus and the third recognition for the Camden Campus Center since opening its doors in 2020. The Wound Care Centers were awarded these prestigious honors by Healogics, the nation’s largest provider of advanced wound care services.

“We are committed to providing our patients with leading-edge technology along with individualized treatment plans, to get our patients back to their best health,” says Holland. “We are proud and honored to have both Centers recognized for their hard work and commitment to our Mission: Find. Treat. Heal.”

Continuing Education: Requirements & Licensure Renewal

Photo courtesy of iStock

Medicine

In Georgia, allopathic (MD) and osteopathic (DO) doctors are both classified as physicians. Georgia does not make a distinction between the two, and they are issued the same type of medical license.

RENEWALS	SECOND RENEWALS AND BEYOND
<ul style="list-style-type: none"> Physicians must renew their licenses every two years before the last day of their birthday month. Failure to do so will lead to revocation of the physician's license by the Georgia Composite Medical Board. However, physicians have the right to obtain a late renewal of their license during the three-month period immediately following the expiration date. 	<ul style="list-style-type: none"> 40 continuing medical education (CME) hours
	<ul style="list-style-type: none"> Physicians who do not hold a certification in pain management or palliative medicine, and who work in a pain clinic, must biennially obtain 20 hours of CME pertaining to pain management or palliative medicine. Such CME must be an AMA/AOA PRA Category 1 CME, a Board-approved CME program, or any federally approved CME. Completion of this requirement may count as 20 hours toward the CME requirement for license renewal.
	<ul style="list-style-type: none"> Physicians who maintain an active DEA certificate and prescribe controlled substances must complete at least three hours of controlled substance prescribing practices. Completion of this requirement may count toward the CME requirement for license renewal. Certification of completion must occur at the first renewal following licensure.
	<ul style="list-style-type: none"> All physicians shall be required to receive at least two hours of education and training regarding professional boundaries and physician sexual misconduct. Such education and training shall include subject matter relating to how to proceed with basic as well as sensitive or intimate examinations and the communication with patients that is required as a component of such examinations. Completion of this requirement may count as two hours toward the CME.
	<ul style="list-style-type: none"> Some CME can be waived in certain situations as well, such as providing peer reviews of investigative cases for the Board or providing uncompensated healthcare services (e.g., free clinics).

EXEMPTIONS

Some exceptions to the CME requirement do apply. Retired physicians who have an active license, and who provide uncompensated healthcare services pursuant to Code Section 43-34-41, are only required to complete 10 hours of Board-approved continuing education biennially. Furthermore, physicians enrolled in full-time graduate medical education programs, such as residencies and fellowships, which are accredited by the Accreditation Council on Graduate Medical Education or the American Osteopathic Association are exempt from the CME requirement. Finally, physicians who are initially licensed by the Board and who have not renewed their licenses for the first time, physicians with inactive licenses, and those specifically exempted due to cases of hardship, disability, illness, etc. are not responsible for the CME requirement. Any physician seeking such an exemption must submit a written request and documentation to support their exemption eligibility in a sufficient time period prior to the expiration of his or her license.

Physician Assistants

Physician Assistant licenses in Georgia must follow the below requirements for first renewal, second renewals and beyond.

FIRST RENEWAL	SECOND RENEWALS AND BEYOND
<ul style="list-style-type: none"> When renewing for the first time, 40 hours of continuing education are not required, but physician assistants who issue prescriptive drug orders must complete three hours of continuing education in practice specific pharmaceuticals in which the physician assistant has prescription order privileges. 	<ul style="list-style-type: none"> Licenses must be renewed biennially on the last day of the month in which the licensee's birthday falls.
	<ul style="list-style-type: none"> 40 hours CME. (At least 10 hours shall be directly related to the specialty of the Board-approved primary supervising physician.)
	<ul style="list-style-type: none"> Physician assistants who are authorized to carry out prescription drug orders are required to complete a minimum of three hours (as part of the 40 CME hours required, when applicable) in practice-specific pharmaceuticals for which the physician assistant has prescription order privileges.

Nursing

Under the Georgia Board of Nursing, licenses for registered nurses (RNs/APRNs) must be renewed every two years by Jan. 31. If licenses are not renewed by Jan. 31 of the expiring year, the license will be revoked, and the licensee will be required to apply for reinstatement with the Georgia Board of Nursing.

FIRST RENEWAL	SECOND RENEWALS AND BEYOND
<ul style="list-style-type: none"> An applicant who is renewing a license for the first time shall not be required to meet the requirements of this subsection until the time of the second renewal if the applicant's initial license period is six months or less. 	<ul style="list-style-type: none"> Registered nurses have five options to fulfill continuing education (CE) requirements: completion of 30 CE hours, maintenance of certification by a national certifying body, completion of an accredited academic program, verification of competency by a healthcare facility or entity, or completion of a Board-approved reentry program.

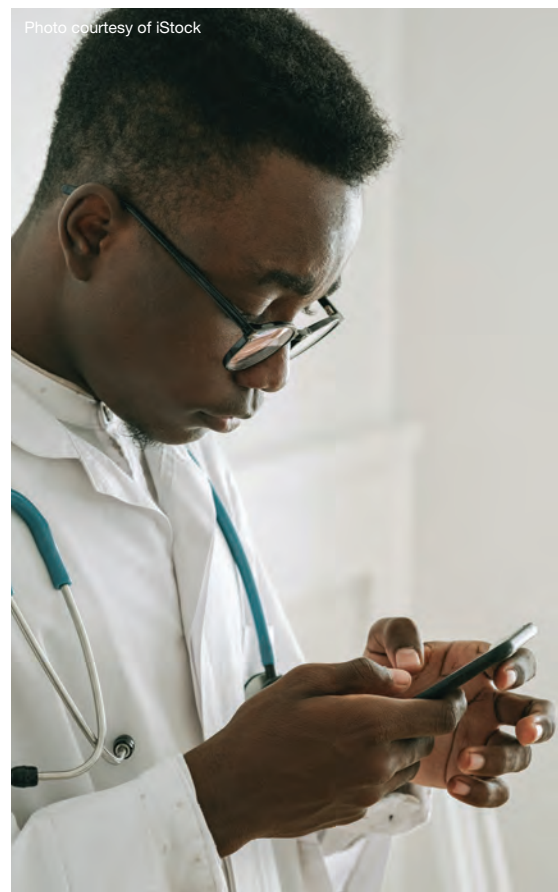

Photo courtesy of iStock

Dentistry

Dentists must renew their licenses by Dec. 31 of odd-numbered years. If the license is not renewed, it will lapse on July 1 of the following year, and the dentist will be required to apply for reinstatement.

FIRST RENEWAL REQUIREMENTS	SECOND RENEWALS AND BEYOND
<ul style="list-style-type: none"> • 40 hours of CE. To meet the continuing education requirements during the first biennium, a newly licensed dentist may submit as their continuing education proof of American Dental Association accredited dental coursework complete within previous two years of the date of the renewal application. 	<ul style="list-style-type: none"> • 40 hours of CE. At least 30 hours of the minimum requirement must be clinical courses in the actual delivery of dental services to the patient or to the community; one hour of the impact of opioid abuse, proper prescription writing, and/or the use of opioids; one hour of legal ethics and professionalism; and two hours of the education and training regarding infection control.

*Georgia Composite Medical Board
<http://medicalboard.georgia.gov>*

*Georgia Board of Nursing
<https://sos.ga.gov/georgia-board-nursing>*

*Georgia Board of Dentistry
<https://gbd.georgia.gov>*

Dental Hygienist

Dental Hygienist licenses also expire on Dec. 31 of odd-numbered years. Late renewal is allowed from Jan. 1 of the following year through June 30. If the license is not renewed, it will lapse on July 1 of the following year, and the dental hygienist will be required to apply for reinstatement.

FIRST RENEWAL	SECOND RENEWALS AND BEYOND
<ul style="list-style-type: none"> • 22 CE hours. To meet the requirements during the first biennium, a newly licensed dental hygienist may submit as their CE hours proof of dental hygiene coursework taken within the previous two years of the date of the renewal application from a university or other institution accredited by the ADA. 	<ul style="list-style-type: none"> • 22 CE hours. (At least 15 hours of the minimum requirement must be scientific courses in the actual delivery of dental services to the patient or to the community; one hour must include legal ethics and professionalism in the practice of dental hygiene; and two hours must include education and training regarding infection.)

CyberKnife® M6™

The CyberKnife M6 offers today's most accurate and noninvasive cancer and tumor treatment.

We measure cancer success in submillimeters.

Southeast Georgia Health System is one of the few locations in Georgia to offer the next-generation CyberKnife M6 Robotic Radiosurgery System with MLC technology. CyberKnife uses real-time imaging to deliver extremely precise radiation directly to cancerous cells in one to five sessions, with most sessions lasting 15 minutes or less.

Using CyberKnife, our Cancer Care Center team treats prostate, lung, breast, brain, pancreatic and liver cancers; trigeminal neuralgia; acoustic neuroma; and recurrent and metastatic tumors. Our CyberKnife results include:

- + **97%** of low risk and **92–97%** intermediate risk prostate cancers cured in five short outpatient treatments
- + **More than 2,000** prostate cancers successfully treated since 2011
- + **Over 90%** local control rate of stage 1 lung cancers
- + **Five treatments** to the tumor bed for some early stage breast cancers
- + **One week of treatment** with excellent efficacy and minimal side effects

To refer a patient, call 800-537-5142, ext. 5149.

Nephrology & Hypertension MEDICAL ASSOCIATES

Experienced Specialists in Kidney Disease & Hypertension

Nephrology & Hypertension Medical Associates, P.C. is a full-service, privately owned and operated practice based in historic Savannah, Georgia. Since 1969, our focus and specialty has been diagnosing and treating patients with kidney related diseases and hypertension. We also provide hemodialysis services, peritoneal dialysis, renal transplant referrals, and care following transplantation.

Nephrology of The Golden Isles specializes in the diagnosis and treatment of kidney disease, hypertension and electrolytes disorders. We are committed to providing quality care in a convenient and friendly environment. Our physicians are all board-certified nephrologists and lead a team of 20 technical and administrative personnel.

We offer a full spectrum of kidney services including patient education in early disease state to preemptive transplantation and dialysis for those with advanced afflictions. Providers and staff provide courteous, compassionate care, helping patients with kidney dialysis management and treatment of HTN, kidney failure and other kidney diseases.

Our nephrologists provide evaluation and treatment for the following conditions and services:

- Chronic kidney disease (CKD) | Kidney transplant | Kidney stones
- Kidney failure | Dialysis – hemodialysis or peritoneal dialysis | Hypertension
- Lupus Nephritis | Hematuria | Proteinuria | Glomerulonephritis
- Polycystic kidney disease | Electrolyte disorders | Inherited kidney disorders

Where we CARE about Your Kidneys

- Refer your patient with confidence

Jamal Salameh M.D.

American Board of Internal Medicine and Nephrology

“Dr. Salameh is a local nephrologist who has extensive experience in kidney disease, internal medicine, and critical care. He was trained at Mayo Clinic and the University of Florida for his specialties. He is affiliated with all major hospitals in Jacksonville, Orange Park and Macclenny. With over 20 years of experience, he is a tireless patient advocate and is skilled in the multidisciplinary and value based care of his patients. Compassion and intellect drive his personal relationship with his patients many of whom have his personal cell number.”
